

Design in Guide - shown by LED ovenlamp example 77.115.8102 + 77.728.U301

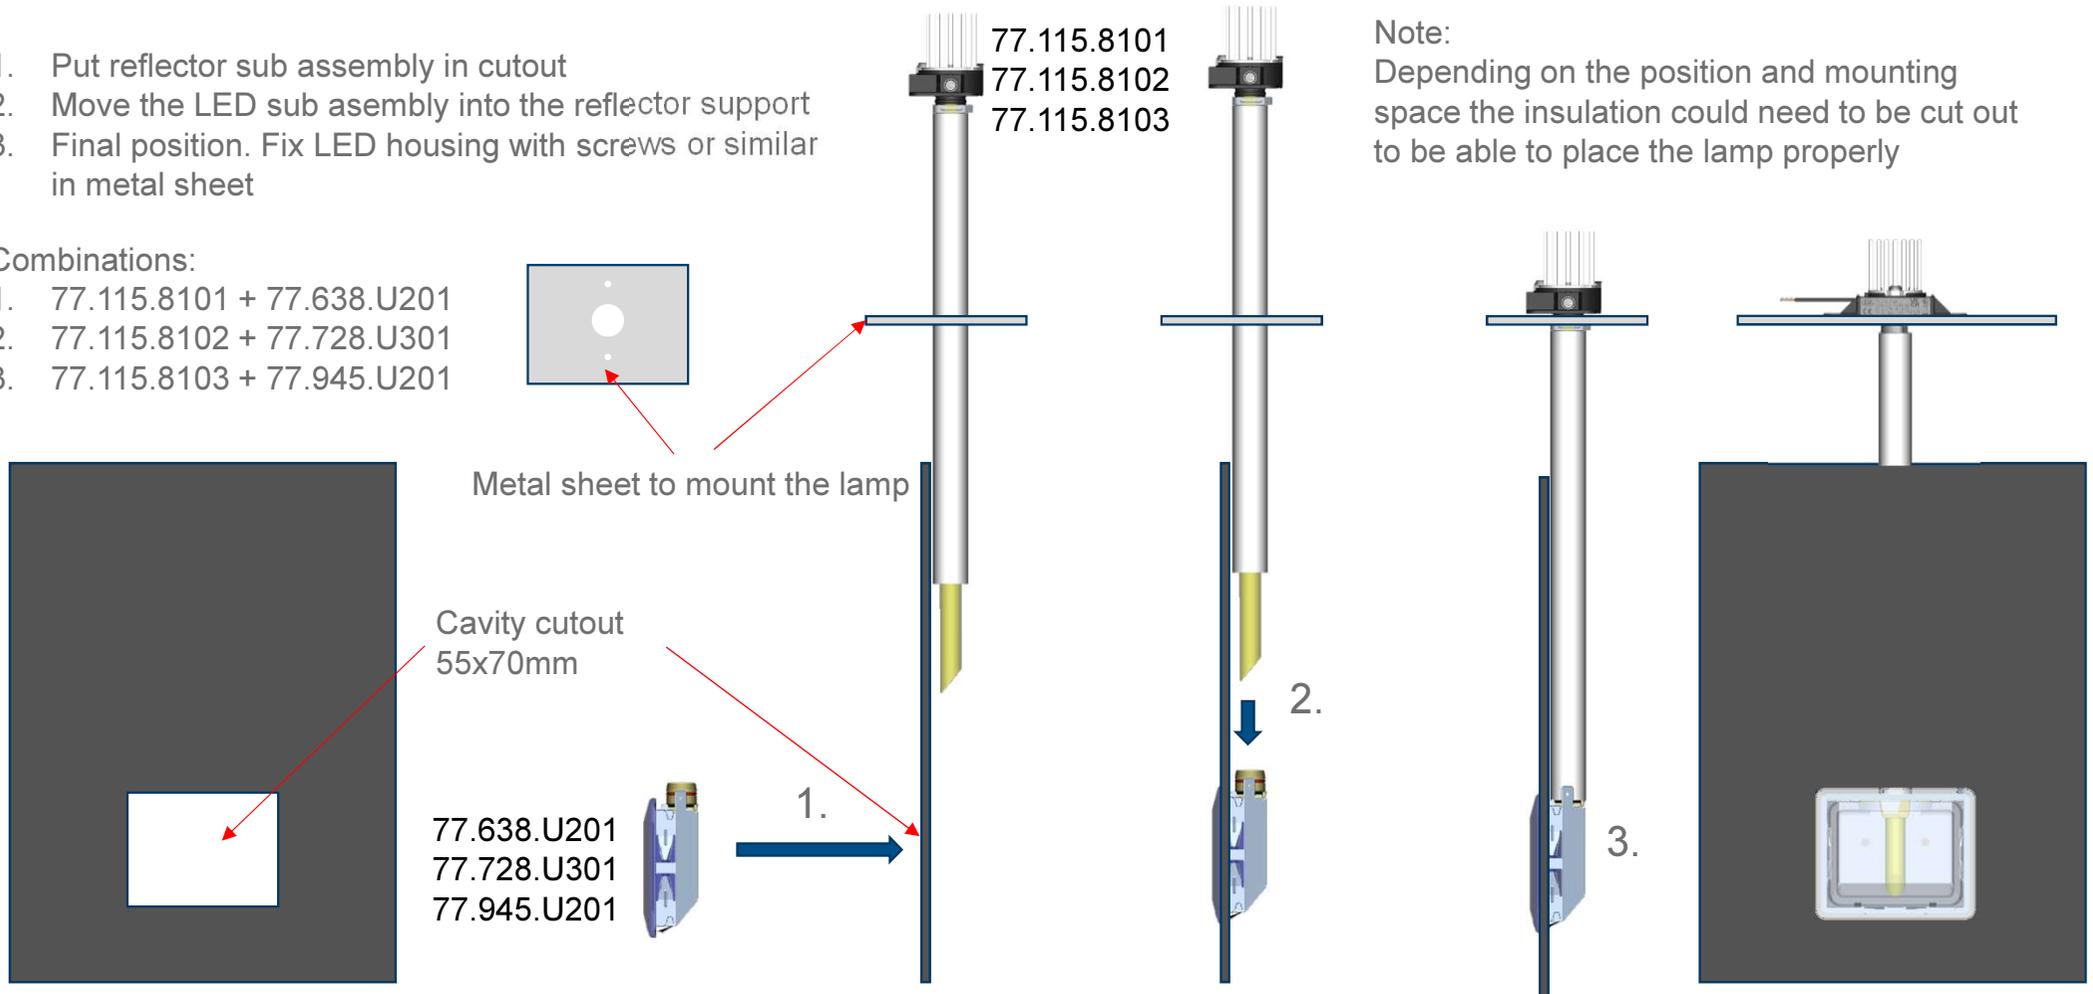

(works similar for every shown combination below)

1. Put reflector sub assembly in cutout
2. Move the LED sub assembly into the reflector support
3. Final position. Fix LED housing with screws or similar in metal sheet

Combinations:

1. 77.115.8101 + 77.638.U201
2. 77.115.8102 + 77.728.U301
3. 77.115.8103 + 77.945.U201

Note:

Depending on the position and mounting space the insulation could need to be cut out to be able to place the lamp properly
